Types of Work Visas in Malta

Malta offers a variety of visas for foreign nationals, including tourist visas, business visas, and visas for medical purposes. Foreign nationals who intend to travel to Malta to work have a few options when it comes to visas:

- **Short-Stay Visa, or C Visa:** The short-stay visa is a type of Schengen visa, which means it allows foreign nationals to enter multiple countries within the Schengen area. This visa is available in three forms to accommodate single entries, double entries, and multiple entries. The C visa allows the holder to remain in Malta for up to three months regardless of how many entries are allowed.
- **National Long-Stay Visa, or D Visa:** The D visa allows foreign nationals to stay in Malta for more than three months. This is the visa foreign employees will need to live and

work in Malta for an extended period of time. Individuals who are traveling to Malta to study will need a D visa as well.

In addition to a long-stay visa, foreign employees will need a work permit. In Malta, this permit is known as an employment license.
